

Chapter 20: Warped Extra Dimensions

Randall-Sundrum

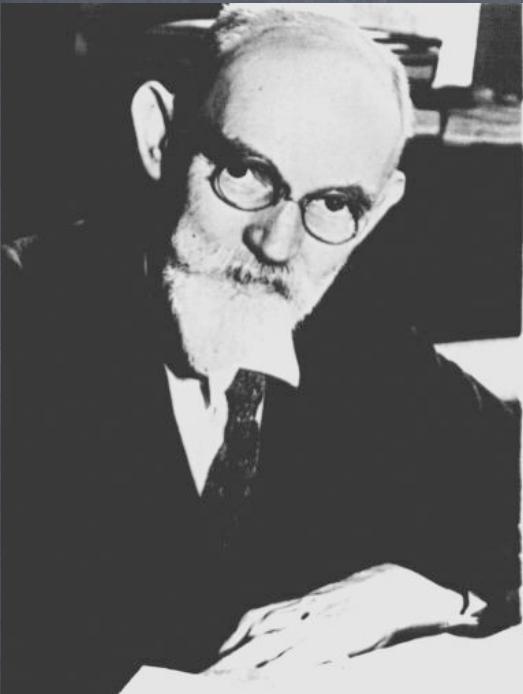

de Sitter

positive
cosmological
constant

de Sitter vs Anti-de Sitter

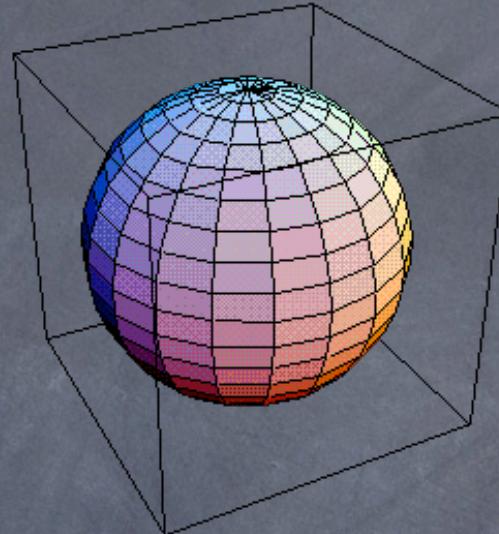

positive
cosmological
constant

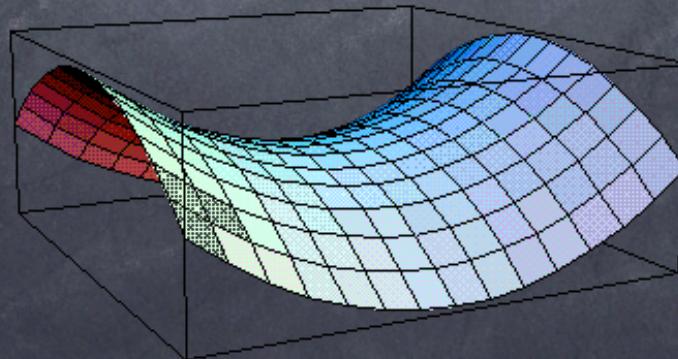

negative
cosmological
constant

Sphere

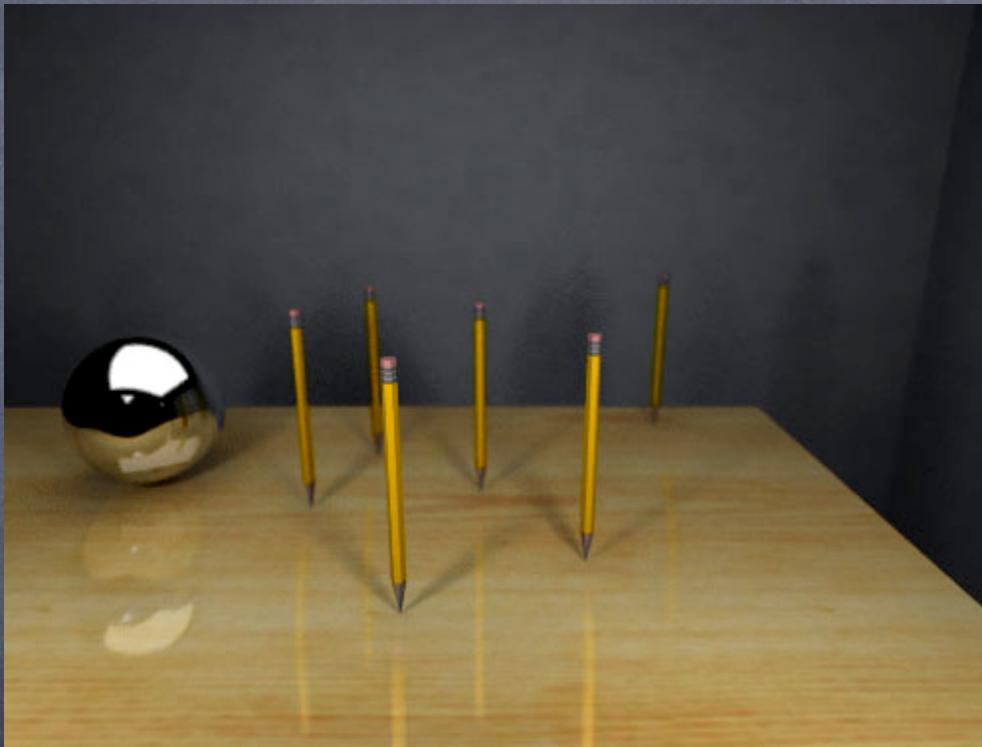

positive
curvature

Anti-de Sitter

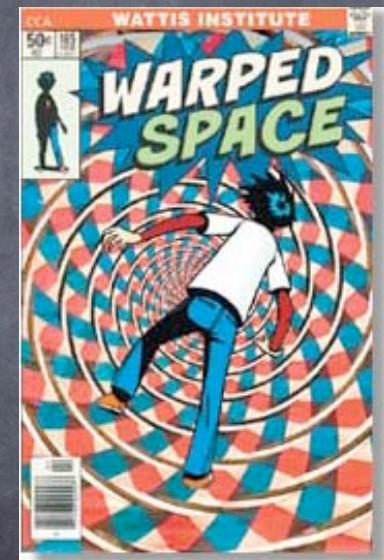

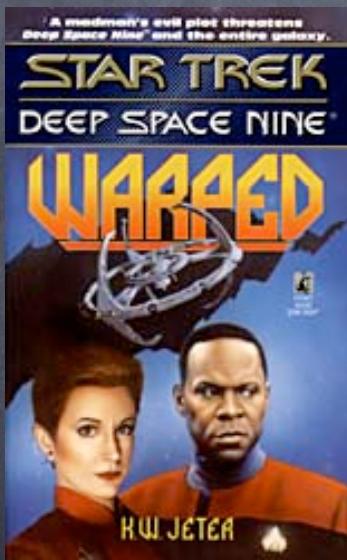

negative
curvature

Fine Tuning Λ

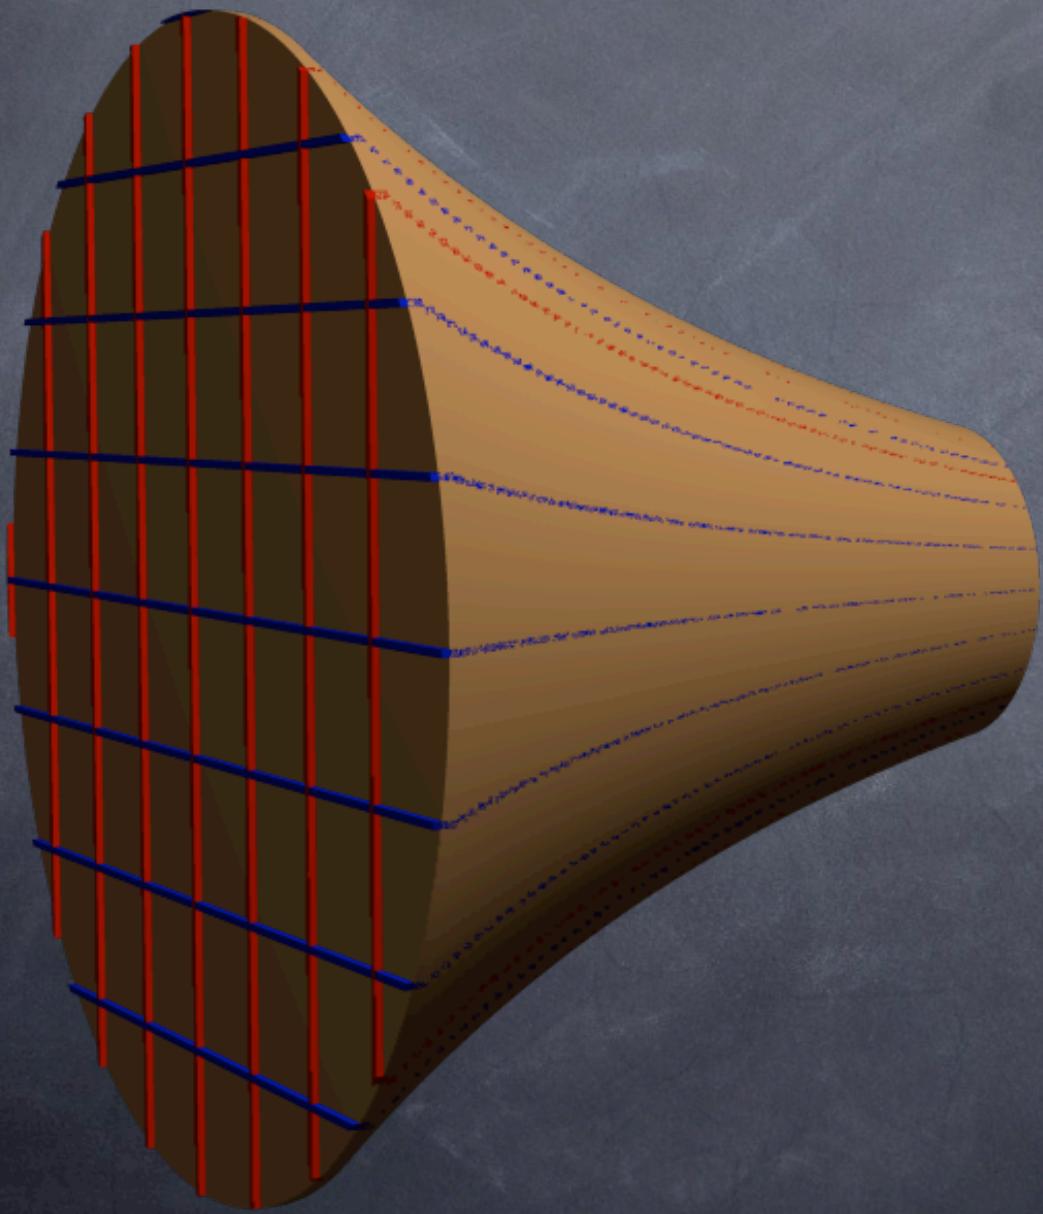

$$\Lambda_{4D} = \Lambda_{5D} + \Lambda_{brane} + \Lambda_{brane} \approx 0$$

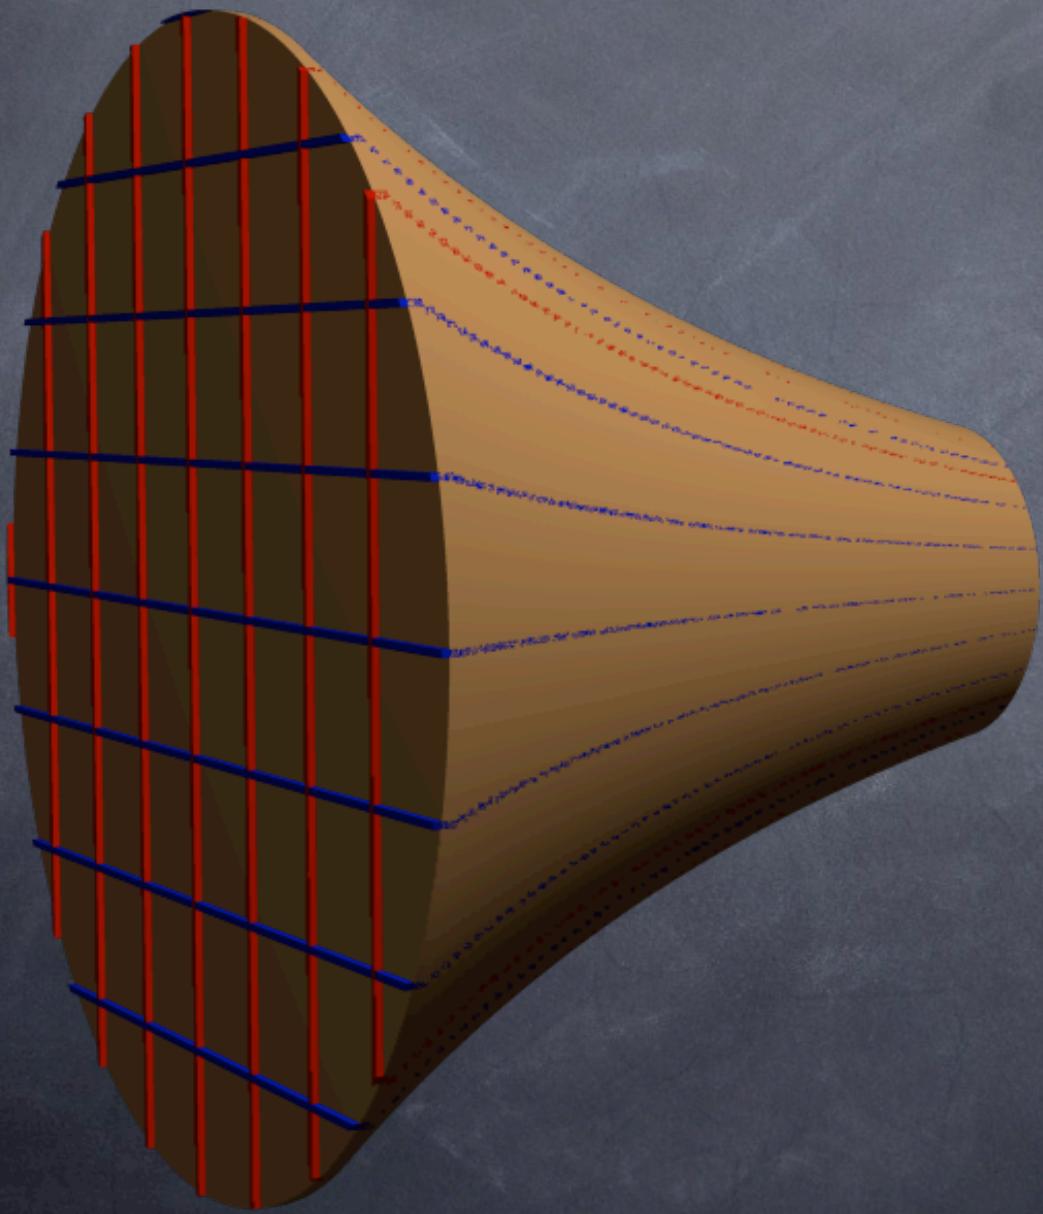

Tom Banks

Detection at LHC

Graviton KK modes at LHC

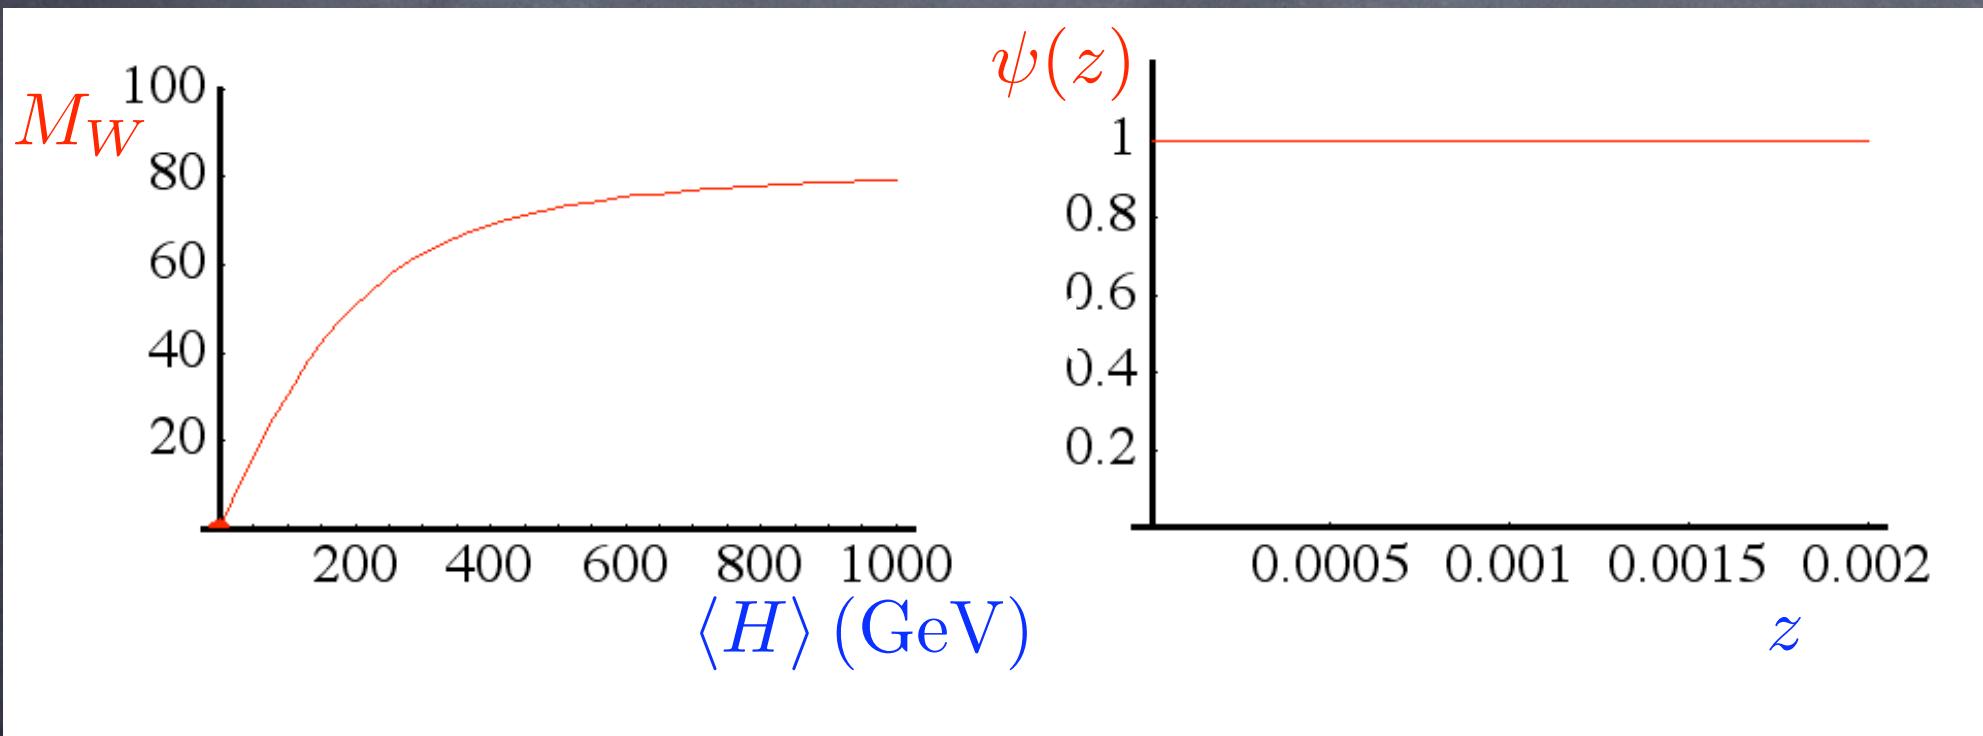

Hierarchy Problem

Max Energy on brane = M_{weak}

$$M_{Higgs} < M_{weak}$$

Higgs on a Boundary

M_W is insulated from divergences

Going Higgsless

Gauge bosons

Weak

Planck

Z boson mass = 90 protons

Hierarchy Problem Now
